### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Group I, claims 1-2, 4-5 and 8 in the reply filed on 8/16/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent (01-202429).

Japanese Patent ('429) discloses an apparatus for successively making plastic bags each of which includes a bottom gusset portion (see fig. 7) incorporated into superposed two layers of panel portion (s, fig. 7), the apparatus comprising panel material feeding means (12, fig. 3) by which web means of panel material is fed longitudinally thereof, and panel material guide means (15, 16, figs. 3-4) by which the web means of panel material is guided to be folded and folded back along a longitudinal

Art Unit: 3721

folded line and a longitudinal folded back line when being fed so that a folded portion can be formed in the web means of panel material and folded into halves (see fig. 7), the panel material guide means comprising a first guide means (16, figs. 3-4) by which the web means of panel material is guided to be folded along the longitudinal folded line when being fed, and a second guide means (15, figs. 3-4) by which the web means of panel material is guided to be folded back along the longitudinal folded back line when being fed and after being fold so that the folded portion can be formed in the web means of panel material and folded into halves, the plastic bag including the bottom gusset portion formed by the folded portion and incorporated into the layers of panel portion which are formed by the web means of panel material, which meets all the claimed limitations.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent ('429) in view of Broenstrup (6425847).

Japanese Patent ('429), as mentioned above, discloses all the claimed limitations except for side gusset portions by the sheets of side gusset material. However,

Broenstrup teaches that is known in the art of making bags to supply side gusset portions (14, fig. 1A) by the sheet of side gusset material (6, fig. 1A). Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the bag of Japanese Patent ('429) with the side gusset of Broenstrup.

### ***Allowable Subject Matter***

6. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hemant M. Desai whose telephone number is (571) 272-4458. The examiner can normally be reached on 6:30 AM-5:00 PM, Mon-Thurs..
